

Amendments to the Specification

SK
9/6/06

Please **replace** the paragraph beginning at page 9, line ¹⁶~~10~~ with the following **rewritten** paragraph:

The trigger message can also be used to inform the display device to read the Main OSD Header and color palette. Additionally, the trigger message will also be able to inform the display device to clear the OSD. Initiation of an OSD Update Block read can only occur through the use of a trigger message from a target to the display device. The display device ~~shows~~ should display pages in the same order as received.
